DETAILED ACTION

1. Applicant's election without traverse of Group II, claims 26-33 in the reply filed on 12/14/2007 is acknowledged.

Specification

2. The abstract of the disclosure is objected to because the abstract must describe the claimed invention. The applicant prosecutes a method while the abstract recites the device. Correction is required. See MPEP § 608.01(b).

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 26 and 33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,41,154,158,164,166 of U.S. Patent No.7,004,953. Although the conflicting claims are not identical, they are not patentably distinct from each other because they recite the same subject matters as following: placing an epithelial delaminator or an electro-mechanical device for separating the epithelial layer or to lift the epithelium layer.

Claim Rejections - 35 USC § 112

Art Unit: 3773

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 26-33 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification (*submitted on 2/25/2004*) in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. In claim 26, the disclosure does not describe “placing *an epithelial delaminator* and moving the epithelium delaminator member to apply a mechanical force *beneath the epithelium* with a force... *to lift the epithelium in a continuous layer but not to cut the stroma.*” In claims 27-28, the disclosure does not describe “a step of forming an epithelial flap and a step of peeling the epithelial flap to expose the stroma”. In claims 30, 31, the disclosure does not describe “the step of reshaping the stroma and the step of applying a laser beam to the stroma”. In claim 33, the disclosure does not describe “the step wherein the lifted epithelium contains substantially no corneal tissue”.
